

Class Project - Wisdom Restaurant Recommendation System

Team 5: Samaa Gazzaz (9), Pooja Shekhar (38), Chen Wang (44), Dayu Wang (45)

Application Setup Guide

1. Install [IntelliJ Ultimate] -> NOT the Community Version!
2. Install [Tomcat 8.5.4]
<IMPORTANT> The version of Tomcat matters!
Installation File in GitHub Repository: ./Application_Resources
3. When running IntelliJ Ultimate for the first time, please install the following (see below).

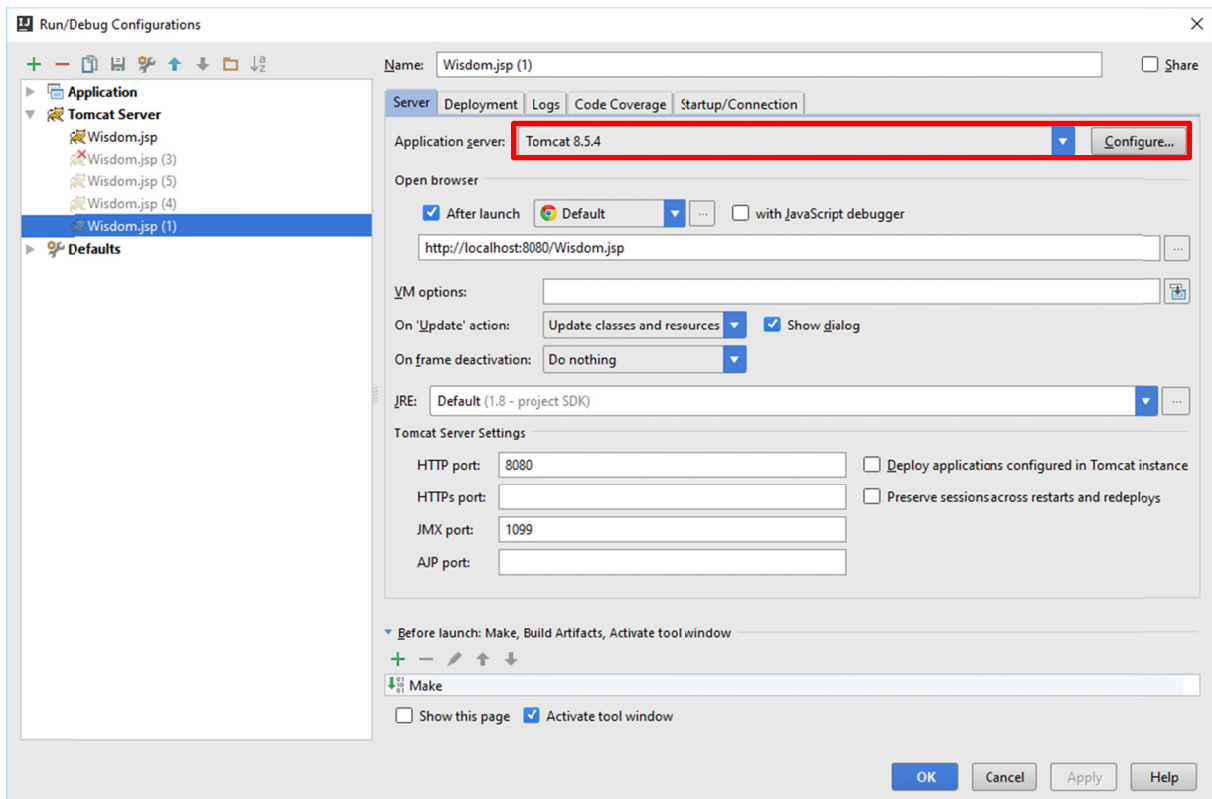

4. Open repository folder “W” in IntelliJ. -> NOT “Import”!
5. Setup Java JDK for the project.
6. Open “build.sbt” and click “refresh”.

7. **<IMPORTANT>** Update all the file directories (absolute paths).

Correlation.java	line 40	line 80
Wisdom.java	line 23	line 77
UserInput.java	line 19	
WebJson.java	line 12	
WebWriter.java	line 12	
WisdomServlet.java	line 30	

8. Setup Tomcat 8.5.4 in Run/Debug Configuration (see below).

9. Right click “Wisdom.jsp” and choose “Run Wisdom.jsp”.

10. If everything was correctly setup, you should see the browser popped up and the application runs.
